*LED Display R&D, Sales, Service,
Manufacturer & Solution Provider*

Meiyad

OUTLOOK

Meiyad focuses on integrating the upstream and downstream industry chain of LED display industry, Each production base has a supply chain of supporting industries such as PCB / LED lamps / plastic bottom frame, strengthening the R&D ability, large-scale standardized production, innovating the hardware and software, perfecting the serving system. Meiyad aims to become the company which integrates R&D, manufacturing, retails and global LED application products.

COMPANY PROFILE

Meiyad always adheres to the business philosophy of "high-performance products, high-standard technology and high-quality service", and focus on customers and innovate based on customers' demands, which had won client's respect and trusts.1.As a leading enterprise in the LED industry, Meiyad has won titles such as "Famous LED Flexible Screen Brand", "Top Ten LED Flexible Display and Transparent Display Application Screen Brand" and "Famous Creative Display Screen Brand". In addition, Meiyad has also passed ISO9001 quality management system certification, ISO14001 environmental management system certification and ISO45001 occupational health management system certification. In terms of products, Meiyad has obtained CCC, ROHS, BIS, environmental labeling product certification, CE, CB, ETL certification and TUV low blue light product certification, which makes Meiyad products more authoritative and persuasive in the LED market.. Innovation on product software and hardware and the constant improvement of service system, Meiyad Optoelectronics is positioned to become a flagship aircraft carrier integrating R&D, manufacture, sales and service of global LED application products.

Shenzhen Meiyad Optoelectronics Co., Ltd. was founded in 2011, national high-tech enterprise which is focusing on R&D, manufacturer, sales and service of LED display. Four production bases in Shenzhen, Hubei, Guangxi and Sichuan, more than 360,000sqm and more 2,000 employees.Meiyad's products are widely used in In&Outdoor commercial dispaly , sports venues, stage performances, university education, military industry, and special-shaped creative fields. More than 30,000 successful cases and spreads in hundreds of countries on overeseas, Meiyad had won trust of internationally renowned brands and captured tens of millions of audiences.

CUSTOMIZED CREATIVE LED DISPLAY

Creative LED display is a beautiful display of art works or landmarks, based on the building or landscape, created with LED pixels, original ideas and culture for origin, showing self-confidence, hopes and dreams as purpose to highlight harmonious visual culture full of unique personality.

CREATIVE CANVAS DISPLAY

Front and rear dual maintenance, with a 90 degree right angle around and a tower shaped top, can not only meet the display requirements of LED displays, but also cope with complex outdoor environments; In the off screen state, it is a painting made of nano spray material, with a pattern error of less than 0.1mm. While ensuring the display effect, it also takes into account the viewing effect of the display screen in the off screen state.

FEATURES ▶▶

The product specifications can be customized

Pixel Pitch (mm)	4
Gray Scale (Bit)	≥14
Pixel Density (pixels/m²)	62500

CREATIVE LETTER DISPLAY

Adopting a stainless steel box, module magnetic suction maintenance, and a strict acrylic panel cover, it can cope with complex outdoor environments and weather conditions. It also combines rich artistic forms with its highly innovative irregular display, bringing greater flexibility, allowing customers to "freely" create any display screen shape. The splicing error between modules is controlled within plus or minus 0.1mm, making it easy to install and can be made into any shape according to user needs.

FEATURES ▶▶

The product specifications can be customized

Pixel Pitch (mm)	5
Gray Scale (Bit)	≥14
Pixel Density (pixels/m²)	40000

FACILITATE THE BUILDING OF LARGE-SCALE DESIGNS

Creative LED products further facilitate the building of large-scale designs as they can be spaced apart at various intervals making the modules a cost-effective solution for extremely large applications.

CREATIVE CANVAS DISPLAY

Front and rear dual maintenance, circular ring without edge wrapping, circular screen edge wrapping treatment, and installation of openings below the wine glass Φ 200mm, with only 20mm edge wrapping, which can meet the display requirements of LED displays and cope with complex environments of water pools and fountains; The module is double-sided glued, and the display screen plays videos, fountains, and music in multiple ways, presenting a perfect visual feast!

FEATURES ▶▶

The product specifications can be customized

Pixel Pitch (mm)	5
Gray Scale (Bit)	≥14
Pixel Density (pixels/m²)	40000

HANGING FLEXIBLE RIBBON LED SCREEN

The screen is designed for the Science Museum. It is a hoisting designing with a total area of around 30 square meters. About 10 new special-shaped modules are developed in the corners, they are used together with rectangle P3 soft modules to make the overall screen splicing perfect. Similar screen designs can be used in shopping malls, special venues, etc. increasing the display art and create check-in points.

FEATURES ▶▶

The product specifications can be customized

Pixel Pitch (mm)	3
Gray Scale (Bit)	≥14
Pixel Density (pixels/m²)	111111

BEAUTY OF ARTISTICAL LED DISPLAY

LED screens now go beyond flat in traditional aspect ratios with revolutionary new LED products that take your creativity to the next level. A new trend has emerged in the market with a variety of small size and shape LED products. These creative products allow for intelligent lighting effects on large-scale backgrounds of any form, shape and size while also displaying logos or full motion video.

CREATIVE 10 SHAPE DISPLAY PRODUCT

Based on customer needs and artistic design, it creates an innovative display. Front maintenance before magnetic suction of the module, edge wrapping treatment at the edges, with a minimum edge wrapping of 70mm and a maximum edge wrapping of 115mm for the "1" screen; 0 "edge wrapping: 100mm.

FEATURES ▶▶

The product specifications can be customized

Pixel Pitch (mm)	1.8
Gray Scale (Bit)	≥14
Pixel Density (pixels/m²)	308641

TUNNEL LED DISPLAY

Multi faceted display can enable potential customers to learn more about consulting from different perspectives, and is the main channel to attract customers and increase revenue. LED digital display screens can help you increase customer traffic, attract more target audiences, and strengthen brand image.

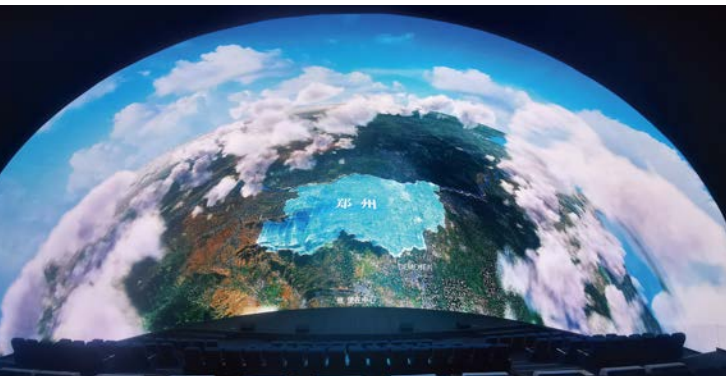

FEATURES ▶▶

The product specifications can be customized

Pixel Pitch (mm)	2.5
Gray Scale (Bit)	≥14
Pixel Density (pixels/m²)	160000

FACILITATE THE BUILDING OF LARGE-SCALE DESIGNS

Creative LED products further facilitate the building of large-scale designs as they can be spaced apart at various intervals making the modules a cost-effective solution for extremely large applications.

DOMETHATERTHEATRCASE SHOWCASE

Dome theater can bring an immersive experience because the module adopts sound-transmitting drilling technology to avoid the echo phenomenon in front of the screen, thus bringing a shocking visual enjoyment to the audience.

FEATURES ▶▶

The product specifications can be customized

Pixel Pitch (mm)	3	4
Gray Scale (Bit)	≥14	≥14
Pixel resolution (pixels/m²)	111111	62500
Diameter (m)	25	17

SPHERICAL LED DISPLAY

The spherical screen is a groundbreaking LED creative spherical display screen with multiple display splits, flexible and irregular displays, and the display screen adopts uniform technology, with high-definition and no distortion. It has a stronger visual impact than conventional LED displays, is more eye-catching, and is more unique for decoration.

FEATURES ▶▶

The product specifications can be customized
